American hydraulic broaching machine. A hydraulic broaching machine uses. Hydraulic vertical broaching machine.

REF:140-16.01.00 003 Easy tool manufacturing: The customer itself or any tool manufacturer can manufacture dies and punches. Folding operation without risk of damaging the blows and dies with thick materials unlike conventional press brakes. This accessory is adapted to the Tooling to shape pipe ends, to perform the operation of widening the ends of the pipes, for their coupling We can find the different sizes in the following PDF file: Download (395.72 KB) Die cutter to form curves on flat bars, tubes, bars or perf them on big radii. We can find the different sizes in the following PDF file: Tools for diameter reduction Download (530.11 KB) Composed of the clamp holder to expand, expansion mandrel and the clamp of the expander. (See the bottom of the page in standard accessories). REF:140-16.01.00 023 Maximum displacement: 250 mm. Hydraulic pressure: 50 to 215 Kg/cm<sup>2</sup>. A perfect for folding small series or special parts without the need for a specific custom mold. REF: 140-16.01.00 006 MAXIMUM CAPACITY OF THE BAR: MAXIMUM CAPACITY OF TUBE 40 mm or 1 1/2": 80x80 mm or 3" MEDIA NIMO: 300 mm. Download (1.21 MB) It dies to bend the metal plate, the flat bar or the square bar for a nice braided braided effect. Ask for a tight quote 3 years warranty Worldwide shipping Technical features Horizontal bending press Brake PP200 has been manufactured in a 60mm thick welded steel monobloc, stabilized and machined. Machine dimensions: 958x1200x1126 mm. All our products are manufactured in our facilities in Spain, are widely used as clamps, handles, etc. Weight: 625 Kg. Lower palletized bench to easily transport the machine to its place of work or storage, a lot of tools that complement it allow several operations in different materials and in different types of profiles. Fold bars and flat sheets into completely closed shapes. Concepción "this horizontal flexion" press It allows the folding operations to be impossible to perform at a conventional press brake. Samples of work done with the press brake horizontal PP200 Flat bar and cutter plate die up to 100mm through a maximum 10mm thickness in Soft Steel., Ref: 140-16-01-00014 MÅ X. Folding length: 4, 60mmmveed: 4, 80Å, 90, 40mm, nÅ, Et.3 Folding punching D22 80Å, Å € PP200Ref: Å, 140-16-01-00027Max. Height: 1400 mm. If the size that the client needs is not on the list, we manufacture it., In the file Å, pdf you can see all the types and sizes we have. Its versatility and easy handling make this machine a horizontal bending necessary for metal work processes. All NARGESAA € à € "" Å "" products are in accordance with EC regulations for the manufacture of industrial machinery. Download (1.15 MB) Punch-Holder Die, compatible with our stunts of the NARGESA brand, Ref: 140-16-01-00022 Galin neck: free distance of 54 mm free for use: Round drilling capacity XIMA of 95 mm: 43 mm Square drilling of perforation: 35 mm rectangular perforation capacity: 20x34mm Oval perforation of perforation: 21x40mm will always depend on the thickness to pierce . Expanding and reducing the ends of the pipes allows you to unite different pipes to make bunk beds, chairs, irrigation systems, tents, greenhouses, etc ... This accessory adapts to the Tooling to shape the ends of the tubes, To perform the operation of reduction of the ends of the tubes, Å, for your coupling. In addition, we have an extra service to design and manufacture exclusive tools on request, for each of the machines we manufacture. (Refer to the lower part of the optional tools and the example video). It is also a solution to bend different profiles on different radii keep the ends straight, as when making handles and flanges. Intensity: 9/5 Å. for joining bars. Volume: 1.23 m<sup>3</sup> Net weight: 625 Kg. Gross weight: 650 Kg. Tariff heading code: Å Å Å Å Å Å Å Å Å Å Å Å Å Å Å Palletized bank to move the machine easily to the work or storage site. The forge in Friar uses horizontal presses to make and form different forms of balosters ... for other forms or capabilities, request the manufacturer. Folding thickness: 8 mm standard tools provided together with the machine. Its robustness, versatility and easy handling are only three of the best characteristics that our hydraulic horizontal flexion machine has. Advantages. Easy Handling: The machine is sent completely assembled, it is only necessary to connect it to the required power supply and begin to perform perfection. Folding length: 150 mm. Compatible with any promcamic blow. It is advisable to obtain one in order to work with the specified matrices. Ref: Å, 140-16-01-00029 Weight: Å, 3.1 kggogoptional Suitable tools for all matrices that form. From a metallic strip, a piece of the desired length in each blow will be obtained. In the PDF file, you can see all types and sizes that have optional tools. Width: Å € Å Å, 20 mm thickness: Å, 4.5,6,8 mm die Length: Å € Å, --
